Rohrback Cosasco: Industrial Corrosion Control Management & Monitoring Solutions

Website www.cosasco.com PRESS RELEASE

SUBJECT: New Microcor® High Sensitivity Corrosion/Erosion Rate Monitoring Data-Logger

FOR IMMEDIATE RELEASE Thursday, 25 August 2011

Rohrback Cosasco launched a newly redesigned corrosion/erosion data-logger. The newly redesigned Microcor® Corrosion/Erosion Rate Data-Logger MWT-3905-MDL (MDL) is the next generation in remote corrosion/erosion monitoring data-loggers, featuring an all-in-one design, lower cost, and improved battery life.

The corrosion/erosion data-logger's new extended 5 year battery life ensures years, not months of uninterrupted operation. Battery replacement costs are reduced and unexpected data loss from power failure is avoided.

When unexpected corrosion problems arise, the corrosion/erosion rate data-logger is a quick and cost effective solution. In a matter of minutes the Microcor Data-Logger can be easily configured and installed in any process media, no power or communication wiring required!

With its compact all-in-one design, the corrosion/erosion data-logger is less cost per monitoring point than its predecessor. The self powered Microcor Data-Logger has low start-up costs and virtually no maintenance costs. With no power and communication infrastructure required, the Microcor Data-Logger is a low cost option for remote locations.

For more information, specifications, and applications on the Microcor Data-Logger for corrosion management is available at www.cosasco.com

About Rohrback Cosasco

Rohrback Cosasco specializes in a complete range of Industrial Corrosion Control Management & Monitoring Solutions. Corrosion equipment is used for a range of internal corrosion monitoring, atmospheric monitoring, remote monitoring, downhole corrosion monitoring, rouge monitoring, erosion monitoring, and scale in water monitoring. Rohrback Cosasco is the known globally as the OEM for the following product brands Microcor®, Cosasco®, Corrosometer®, Corrater®, Corrdara® and Ultracorr®.

Additional corrosion Services include asset preservation consultancy, remote monitoring and data collection, field services inspection, maintenance and training.

These corrosion control products & services commonly used in oil and gas, petrochemical, water treatment, chemical, pulp and paper, and pharmaceutical industries. The company is ISO 9001: 2008 certified; the products conform to CE and ATEX standards.

For more information, please contact Rohrback Cosasco at sales@cosasco.com, tel: +1(562) 949-0123 ext 213, or email Kathleen Rosario KRosario@cosasco.com.
